

DATE: November 17, 2021
TO: Market Participants
FROM: The Independent Market Monitor for PJM (MMU)
SUBJECT: eDART Fuel Inventory and Emissions Survey Reminder

The Market Monitor reminds all owners of fossil fuel fired units that the survey below must be completed by November 21, 2021. As PJM noted, this data request is mandatory and is required for reliable operations planning purposes and enhanced PJM situational awareness.

Annual Fuel Inventory and Emissions Data Request

In anticipation of winter 2021 - 2022, PJM and PJM stakeholders are taking various steps to prepare for reliable operations. PJM recommends that resource owners have sufficient fuel, supplies, and winterization steps to be ready to operate for several weeks under adverse winter conditions.

As announced at recent PJM stakeholder meetings, PJM has issued a new eDART Generation Owner data request on October 15, 2021, in accordance with PJM Manual 14-D, Generator Operational Requirements, Section 7.3.5 Fuel and Emissions Reporting, with a focus on Generator Fuel Inventory and Emissions updates for the upcoming 2021/2022 winter season.

This data request is mandatory and is required for reliable operations planning purposes and enhanced PJM situational awareness. For clarification, this is different than the recently initiated weekly fuel inventory and supply data request and is the annual fuel inventory and emissions data request for all fossil fueled resources.

The information provided from this data request is required to meet the intent of the recommendations included in the NERC Alert dated August 18, 2021, ([NERC Alert Recommendation to Industry: Cold Weather Preparations for Extreme Weather Events](#)) including Generation Owners communicating to the RC/BA/TOP relevant pre-winter data on generator fuel supplies, fuel and emissions constraints, alternate fuels data, etc.

as needed for the RC/BA/TOP to maintain situational awareness and incorporate this data into seasonal operating plans for the upcoming winter season.

The data request also provides information that aligns with the FERC/NERC February 2021 Cold Weather Grid Operations: Preliminary Findings and Recommendations ([February 2021 Cold Weather Grid Operations: Preliminary Findings and Recommendations](#)).

PJM requires that Generation Owners and/or Market Participants complete the data request no later than 23:59 EPT on November 21, 2021. Failure to comply with this Seasonal Fuel Inventory and Emissions Data Request may result in potential referral to FERC Office of Enforcement, and is potentially actionable as a violation of the Tariff, the applicable ISA, and/or Operating Agreement section 11.3.1. As noted above, the data request is mandatory for all Generation Owners and Market Participants, and the obligation to respond is not excused even if a third party asset manager or other third party contractor is responsible for fuel procurement.

Please note that PJM will share all data request responses with its independent market monitor, Monitoring Analytics, LLC. In addition, data responses could be requested by regulators and PJM would share with member notice only in accordance with the PJM Operating Agreement, section 18.17.

This data request must be submitted through the eDART web forms or via eDART TXT file upload, and cannot be submitted via email. The data request has been pre-populated with member responses from last year, except in a few instances where there was a change in unit ownership or modeling. All Generation Owners should fill in responses to questions that were not pre-populated and review the responses that were pre-populated to ensure that they are still accurate.

Questions pertaining to the eDART GO Fuel Inventory and Emissions Data Request can be sent via email to edartgosurvey@pjm.com or by phone at (610) 666-2282.

If this e-mail has reached you in error, please notify PJM and, if possible, forward this email with attachments to the entity/workgroup that handles eDART generator outage reporting, and/or staff that handles Fuel Inventory & Emissions information within your organization.

A copy of this email notification has been sent to the eDART contact for all companies receiving the data request.

This has been sent to: eDart, SOS, OC, MRC, RSCS
